

Winter Camps 2025

December 29

4K-K - Polar Playground

Forecast calls for fun! From peculiar penguins to the science of snowflakes, join us for arctic adventure you won't soon forget.

1st-3rd - Arctic Explorers

Don your coat and boots because it's about to get frosty! Waterproof a penguin, take an arctic plunge, and drop to -321°F with our supercool liquid nitrogen. It's bound to be the coolest camp in town!

4th-6th - Sub-zero Survivors

Study the animals and learn from the people that call the arctic home on this frosty safari expedition. From traditional survival games to liquid nitrogen explosions learn if you have what it takes to survive the harshest environment earth has to offer.

December 30

4K-K - Planet Pals

Journey into outer space and learn all about our amazing planets! Create asteroid craters, craft your own planet, and imagine all of the incredible life that could be out there for us to find!

1st-3rd - Starlight Explorers

Look to the skies and marvel at the incredible world beyond the stars! Bask in the beauty of the universe, journey to different planets cataloguing their climate and imagining their wilds, and start thinking about what it might be like to one day populate space.

4th-6th - Mission: Horizon

This mission will take us to the final frontier! From meteors to black holes, humans are discovering more about our universe every day. Travel through the cosmos as we defend our planet, look for resources, and explore ways that we might be able to sustain ourselves in outer space.

December 31

4K-K - Celebration Seekers

A playful camp introducing 4K-K campers to worldwide New Year traditions through stories, songs, and hands-on science!

1st-3rd - Passport to Midnight!

Campers will dance, create, and celebrate as they discover the wacky and wonderful ways the world rings in the new year.

4th-6th - Cross-Continental Countdown!

This camp blends fun and discovery as students learn how celebration connects communities across the world.

January 2

4K-K - Arctic All-Stars

Why is ice slippery? How do skaters spin so fast? Will your team stick the landing, or slip into silliness? Everyone's a champion when curiosity is the main event in this Winter Olympics themed camp!

1st-3rd - Downhill Thrills

Explore the wow-factor behind the Winter Games - why curling stones slide so smoothly, what it takes to race downhill at top speeds, and how bobsleds stay on the track. Gravity rules in this camp where science and sport collide.

4th-6th - Luge your mind

Campers will step into the shoes (and skates!) of Olympians in this fast track of winter sports experiments. Become a human hockey puck, wear frictionless shoes, and even design a ski lift. S'no pain, S'no gain!
